Why Drupal

Mohammad Abdel-Qader
Servit Open Source Solutions

Who am I ?

- Name: Mohammad Abdel-Qader

- Experience:
  - 1 years Java developer (Oracle - ADF Application).
  - 7 month PHP Drupal developer.

- About me:

  I believe that we can.

What is CMS?

- Content management system, which allow non-technical persons create, publishing, and archiving there content.

- No need for coding experience.

Some CM system's

- Wordpess (2003)
- Joomla (2006)
- Drupal (2001)

Drupal

- Developed by Dries Buytaert.

- At beginning it was "Dorpje" Dutch word which in English means "little village".

- the first Internet website powered by an online version of Drupal was Drop.org

- Dries decided to open source his software, and called it drupal in 2001.

Drupal VS Other CMS

- What you need, will defined the CMS that you will use.

- The limitations of both Drupal and other CMS depend only on the experience and resources of the user.

- Normal user can do a lot in Drupal, which can't been done with other CMS.

- TIME , EFFORT.

Why Drupal?

- CMF not CMS

- Simply because the road to what you need is more straightforward.

- The large number of contribution modules.

- No limitation on getting functionality.

- Active community.

Some websites with drupal
